On-Farm Energy Production Survey

USDA is conducting the first-ever On-Farm Energy Production Survey. This survey gives farmers and ranchers the opportunity to highlight their renewable energy practices using wind turbines, solar panels, anaerobic digesters, and other alternative energy sources.

This is a chance to show the nation your continued commitment to the environment. Look for the survey in May 2010. As with the Census of Agriculture, this survey is your voice, your future and your responsibility.
